Continuation of 10. Other: The proposed amendment to claim 1 changes the scope of the claim and requires further search and consideration. The present language of claim 1 does not disinguish between electrodes as an actuator, since they actuate the piezoelectric element, or piezoelectric elements as actuators. The claim language specifies actuators respectively associated with each of the ink channels for pressurizing ink contained in the ink channels. Since the electrodes actuate the piezoelectric elements and cause the ink contained in the ink channels to be pressurized, they satisfy the claim language and function as actuators.
